

## Style the "About Me" Page

### Instructions:

1. Create a new file named `style.css` in the same folder as your `index.html`.
2. Link this stylesheet in the `<head>` of your HTML file.
3. Add the `box-sizing: border-box; reset` to the top of your CSS file.

### Requirements:

1. Give the `<body>` a light background color.
2. Wrap your main content (everything except the `<h1>` maybe) in a `<div>` with a class, for example, `class="card"`.
3. Style this `.card` div: give it a white background, some padding, a border, and a `border-radius` to round the corners.
4. Set a `max-width` on the `.card` (e.g., `800px`) and center it horizontally using `margin: 0 auto;`.
5. Use Flexbox on the `<body>` to center the `.card` vertically in the middle of the page.
6. Import a font from Google Fonts and apply it to the `<body>`.
7. Style your `<h1>`, `<h2>`, `<p>`, and `<a>` tags with different colors and font sizes to create a clear visual hierarchy.
